

1700 LTR CHAFF STORAGE JACKY® BIN

Product Code: **LA1500/2CHF**

The JACKY Bin model LA1500/2CHF has been developed to meet the needs for safely and easily storing and dispensing products which contain a high amount of fibrous material. Products such as cottonseed meal, oaten or lucerne chaff, palm kernel and other such 'fluffy' or coarse materials, can be very difficult to discharge from a bulk bag or standard hopper bin. The LA1500/2CHF combines the options of a low profile, vermin resistant hopper with a large enough volume to hold a bulk bag of just about anything, while the extra large discharge allows the user to be confident in their capacity to easily and effectively control the discharge rate of difficult to flow products.

The Centre Discharge JACKY® Bin incorporates a poly hopper mounted on a forkliftable steel base. A slide-hatch mechanism allows for precise control of the discharge rate through a centrally located hatch. Extra wide forklift tyne pockets cater for a large range of lifting attachments.

Model LA1500/2CHF Benefits

- 1200kg Safe Working Load
- 1700lt hopper volume
- Ideal for cottonseed meal, palm kernel or chaff based products
- Large opening for easy filling and cleaning
- 54° run slope assists with complete evacuation of contents
- Large hatch plate with big hand grip for easy open/close action
- Standard colour Faint Green (translucent green)
- Customizations such as serial numbers, branding etc. available please ask.

SPECIFICATIONS

Code	LA1500/2CHF
