

# 950 LTR STEEL BASED PALLET BIN

Product Code: **QP950**

Very heavy duty and ready for action – the QP950 steel-based pallet bin is excellent for use in high demand applications such as battery recycling. These bins can be used with a rotating fork attachment, and are easy to clean.

The fabricated steel base can be supplied painted or hot dip galvanised.

## Plastic Pallet Bins

Designed with industry in mind, plastic pallet bins from Orion Australia are the bin of choice for many leading Australia food manufactures.

Solid construction from heavy-duty food-grade plastic ensures they are long-lasting and durable. The moulded interior is easy to clean unlike traditional bins with sharp corners and many crevices.

The food-grade plastic bins also provide excellent performance in blast freezers and chillers. They can easily be moved by forklift or other lifting device, and optional rotator plates can be fitted.

All plastic pallet bins can have optional colour coding, barcoding, or serial numbering can help to identify and track batch lots.

- Easy to clean bin designs reduce cleaning costs.
- Heavy-duty food grade polymer construction increases longevity and durability.
- Excellent performance in chillers and blast freezers, adding value and long-term benefit for investment.
- Optional custom branding, colour coding, serial numbering and barcoding to greatly assist in tracking batch lots.
- Optional lid, rotator plates, drain bung or embossing/stamping
