

CLEAN RAIN ADVANCED® DIVERTER

Product Code: **RTCR02**

The all-in-one rain head, first flush diverter and stormwater overflow.

Clean Rain Advanced® is an all-in-one rain head, first flush diverter and stormwater overflow. Simple and reliable mechanics allows the rain head filter to shed leaves, while the 'Smart Sense' first flush diversion system automatically activates when water is detected and diverts the first flush of rainwater which contains contaminants from the roof to stormwater.

- The Rain Head single screen technology deflects leaves and debris away from the flow of water, allowing greater flow rates and maximising collection of rainwater
- Diverts the first flush of rainwater which contains contaminants from the roof to stormwater no additional chamber required
- The Clean Rain® Body swivels for convenient outlet positioning, fits standard garden, 22mm grey water and 38mm pool hoses, and 90mm pipe
- Multi-fit downpipe adaptors 90mm and 100mm, 100 x 75mm and 100mm x 50mm
- Easily accessible on/off switch, with a safety overflow to stormwater drain
- Minimal maintenance
- Built in safety overflow to stormwater
