

GREENTEATS

CALF FEEDING TEATS

GREENTEATS. Leading the way in teat hygiene, for maximum protection of your valuable young livestock at the time when they need it most.

The special, compounded elastomer rubber formula contains an Anti-Microbial / Anti-Bacterial additive which is 99.9% effective in stopping microbial activity on the surface of the teat – both inside and out.

'Steri-Teat' – a silver ion based antimicrobial/antibacterial agent. Silver acts as a catalyst & disables the enzyme that, one-celled bacteria & fungi need for their oxygen metabolism. **They suffocate & are destroyed.**

To help protect your valuable livestock, Greenteats™ feature Steri-Teat™ - a world class anti-bacterial and anti-microbial additive, which kills 99.9% of microbes which come in contact with the teat surface, both outside and inside!

Properties

- Manufactured from Industrial quality EDPM rubber for longevity and service
- Each teat contains STERITEAT™ Anti-Microbial / Anti-Bacterial additive
- Positive, leak resistant properties
- Fits many common calf feeders
