

JACKY 12V REMOTE HATCH ACTUATOR KIT

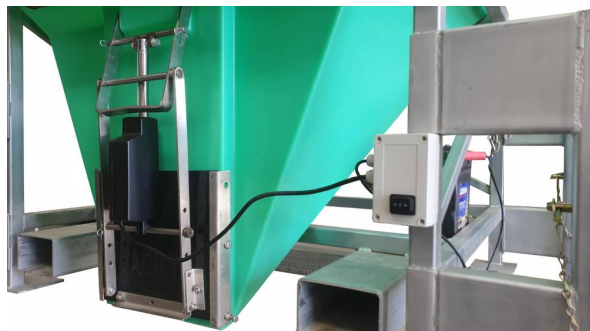

One of the most popular additions to a standard JACKY Bin, the 12V remote hatch actuator makes easy work of opening and closing your JACKY Bin hatch.

WORK SMARTER. NOT HARDER.

The JACKY 12V remote hatch actuator is a quality, purpose-built electronic controller and linear actuator combination which can be fitted to most JACKY Bins, as well as other makes and models of self-discharging hopper vessels. Supplied with two actuator switches which are identically paired with the controller, the unit can be operated from up to 20m away. They are a popular addition to feed out trailers – no need to stop and open the discharge hatch manually – simply press the button and keep moving!!

Specifications

- 12V power supply required – car or motorbike battery are ideal
- 150mm stroke length
- 500Nm working strength
- Weatherproof construction
- "Hold to operate" button function – set discharge rate to suit yourself
- Easy to retro fit to existing bins and hoppers
- Travel speed approx. 35mm/sec
- 5A current draw under normal load
