

OFFAL BINS

Heavy-duty, robust Offal Bins and Skips, designed specifically for the Meat Processing Industry.

Orion Australia have worked closely with processing plants to produce a range of Procon heavy-duty, robust offal bins and skips designed specifically for the Meat Processing Industry. Tried and proven in operation, Procon offal bins are built to last in high-demand environments.

- Heavy-duty polymer to withstand the rigours of factory use.
- Nestable for empty return.
- UV stabilised for increased longevity.
- Optional serial numbering for tracking batch lots.
- Custom branding and colour coding available.
- Rotator plates may be fitted to allow bin to turn in place.
- Range of sizes available.

The skips are very robust and, other than operator damage, we have had no problems with their longevity. They are well finished and easy to clean.

- S.S., Offal Processing Plant, NSW

On many occasions, the team at Orion Australia have worked closely with clients to provide custom solutions. Please contact our team on 1800 752 784 or via the [Contact Us](#) page.
